DETAILED ACTION

1. In claim 1, part (b), "front axle" should be corrected to --front axle --; parts (d), (e), (f) and (g), "front and rear axle" should be changed to -- front and rear axles--; and "said first and second supporting axle" lacks antecedent basis and proper correction is required. Note also in part (g), "first and second supporting axle" should read -- first and second supporting axles--.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Larson (US 3,508,496).

Larson discloses a vehicle having all of the features recited in the instant claim, including axle 80 for traveling on first track 34,38, motor 42 engaging axle 80, and supporting axle 62,62a being co-axial with axle 80 and operatively extendable therefrom. Note that axle 80 is capable of supporting the vehicle body on a road, as broadly claimed.
